## A NEW ROAD.

### Another Transcontinental Line Coming this Way.

For the past four years, the Atlantic & Pacific Railway Construction Company of Chicago, Illinois, has been preparing for the construction of a double track air line railway from New York to San Francisco.

The great highway, as now surveyed between New York and Chicago, will shorten the distance 200 miles over all other railroads, while the distance between Chicago and San Francisco will be shortened over 400 miles. The projectors have contemplated from the very inception of the enterprise the making it an integral part of the Government. A bill is now being prepared to be presented to our National Congress, at its next winter's session, placing the entire enterprise under the supervision of the Government for its endorsement of the bonds of the road.

All traffic over it shall be at a cost of interest and running expenses, while greatest speed, saving of time, and modern comforts may be accorded to the people at a minimum fare and cost.

The line from New York to San Francisco (2700 miles) will cost \$400,000,000. If the road is built by an independent corporation the securities will bear interest at 5 per cent, and are contracted for in Europe at 90 per cent of their face value. With our Government's endorsement of the bonds at 3 per cent, for which the Syndicate have contracted, we will save not only the 10 per cent of their face value, selling them at par instead of 90 cents, but we shall also save annually 2 per cent in interest, making a saving annually of \$8,000,000 from New York to San Francisco.

The interest on the bonds for the first division, from New York to Chicago, being \$3,720,000 annually, will be a small sum for the Government to guarantee, and will convince the whole nation that the enterprise, from ocean to ocean, will be a complete success. The interest on the entire line across the Continent will be \$12,000,000 annually, and will be but a small consideration for the advantages accruing to the Government in the one instance of mail service.

It will be one grand, economical event of the close of the Nineteenth Century. The actual construction of the line will be commenced in all the states between New York and Chicago by the middle of next year, and will be completed and in operation in the year 1900.

The success of the enterprise from New York being assured, the reception of the bill at our coming session of congress, already sanctioned by some of our ablest and most conservative representatives and senators, will receive the attention of all interested in the building of the road from Chicago to San Francisco.

Wm. Dallin,  
V. P. & Gen. Mgr.
